

A DIVISION OF BIOFIELD PHARMA  
**BIORISE PHARMA**

Precision Medicines. Trusted  
Outcomes.

# Biorise Pharmaceuticals: Specialized Division for Cardiac, Diabetic, and High Value Specialty Therapies.

**Meeting the Evolving Needs of Modern Clinical Practice.**

Biorise Pharmaceuticals is a specialized division focused on Cardiac, Diabetic, and high-value specialty therapies, developed to meet the evolving needs of modern clinical practice.

**A Sister Concern of Biofield Pharma Pvt Ltd, Bringing Together:**

Strong Pharmaceutical Legacy

Doctor-Driven Product Development

Focus on Evidence-Based Formulations

Our portfolio is designed based on real clinical demand, ensuring relevance, efficacy, and better patient compliance.

**Portfolio Designed for Real Clinical Demand: Ensuring Relevance, Efficacy, and Better Patient Compliance.**

# OUR FOUNDATION

## Strong focus on:

Backed by **Biofield Pharma Pvt Ltd** – 25+ years of pharmaceutical excellence. Supported by a **WHO-GMP-certified in-house manufacturing facility**

Strong focus on:

Quality-controlled production

Stable and consistent formulations

Regulatory-compliant processes

Stable and consistent formulations

Regulatory-compliant processes

# OUR APPROACH

At Biorise, we don't just launch products —  
we **respond to clinical needs**.

- ✓ Molecules selected based on **doctor demand & prescription trends**
- ✓ Focus on **combination therapies improving compliance**
- ✓ Designed for:
  - Better tolerability
  - Improved outcomes
  - Long-term patient adherence

Bridging the gap between **clinical requirement & pharmaceutical innovation**

# PRODUCT RANGE

## Nutraceuticals & Personal Care

- Nutraceuticals and health supplements
- Cosmetic and personal care products

## Therapeutics & Dosage Forms

- Topical therapeutics for pain relief and dermatological care
- Tablets, capsules, softgels, syrups, powders, sachets, ointments, lotions, and other dosage forms

## Specialized Formulations & Ranges

- General, gastro, gynae, ortho, and pharmaceutical formulations across diverse therapeutic segments
- Paediatric, dermal, cardiac-diabetic, dental, ophthalmic, and injectable ranges
- Specialization Molecules.

# MANUFACTURING & QUALITY EXCELLENCE

## IN-HOUSE MANUFACTURING FACILITY

**Biorise Pharmaceuticals** is backed by a **state-of-the-art** facility over quality, consistency, and delivery.

WHO-GMP Certified

USFDA OTC Approved

Dedicated production lines

Advanced machinery

Ensuring **global-standard manufacturing for every product**

## ROBUST IN-HOUSE R&D

Our formulations are supported by a robust **in-house Research & Development team**, focused on innovation and clinical relevance.

Scientific formulation development

Continuous product improvement

Focus on advanced & specialty molecules

**Driven by science, not just scale**

## GLOBAL QUALITY. SCIENTIFIC PRECISION. TRUSTED MANUFACTURING.

### GLOBAL QUALITY. SCIENTIFIC PRECISION. TRUSTED MANUFACTURING.

- WHO-GMP Certified | USFDA OTC Approved Facility
- In-house R&D with advanced formulation expertise
- 2 HPLC Labs | Stability Studies | Dissolution Testing
- Regulatory experience across 48+ countries
- Export presence in 19+ countries

*Delivering world-class pharmaceutical excellence*

Export presence in 19+ countries

In-house R&D with advanced formulation expertise

2 HPLC Labs | Stability Studies | Dissolution Testing

Export presence in 19+ countries

# Why choose us

## WHY BIORISE

Clinically relevant molecules

Backed by trusted manufacturing

Continuous innovation based on feedback

High-quality, stable formulations

Focus on patient outcomes

Backed by trusted manufacturing

# A brand built with doctors, for doctors

# Current Product Portfolio

Each product is developed keeping clinical efficacy, safety, and patient compliance in focus.

In the management of Hypertension & Cardiac Arrest Reduction

## Telsicap-40

Telmisartan 40 mg Tablets

**Telmisartan**  
 • Telmisartan is used in management of Hypertension (High Blood Pressure) prevention of Heart Arrest Reduction and Heart Failure.  
 • Telmisartan is an angiotensin receptor blocker (ARB). In this class, telmisartan has the lowest risk of side effects. It also blocks the actions of ACE inhibitors. Together, they ensure the blood pressure remains under control. This means the blood pressure remains under control. This means the blood pressure remains under control.

The smart choice in the management of Hypertension & Cardiac Arrest Reduction

Safe & Reliable

Half of hypertensive patients fail to attain BP goals on single-drug therapy

## Telsicap-AM

Telmisartan 40mg + Amlodipine 5mg Tablets

**Telmisartan**  
 • Telmisartan is amlodipine is used in the treatment of Hypertension (High Blood Pressure)  
**Amlodipine**  
 • Telmisartan is an angiotensin receptor blocker (ARB) and Amlodipine is a calcium channel blocker (CCB). Telmisartan blocks the blood vessels and opening the more effective to control Blood Pressure throughout the day. Together They lower Blood Glucose effectively.

Unique two action for one target

In High Blood Pressure For Adequate control...

## Telsicap-H

Telmisartan 40 mg + Hydrochlorothiazide 12.5 mg Tablets

**Telmisartan**  
 • Telmisartan and hydrochlorothiazide which lowers the blood pressure effectively. Telmisartan is an angiotensin receptor blocker (ARB) in which by blocking the vasoconstrictor angiotensin, thereby lowering the blood pressure. This allows for smoother flow into the body and the heart to pump more effectively.

**Hydrochlorothiazide**  
 • Hydrochlorothiazide is a diuretic that removes extra water and sodium from the body. This helps the heart relax and control blood pressure and prevent stroke.

When Gams is All about High Blood Glucose...

## GLEMITOL-M2

Glimepiride 2mg + Metformin (SR) 500mg TABLETS

### BENEFITS OF COMBINATION

- Controls insulin secretion disorder & improves vascular
- Shows a combined insulin effect
- Suitable for longer duration of diabetes
- Preferred choice in hypertensive patients with diabetes for optimal insulin glucose control

IN MANAGEMENT OF TYPE-2 DIABETES MELLITUS PATIENTS UNCONTROLLED ON MONO THERAPY

Take the Smart Action Against High Blood Glucose...

## GLEMITOL PM 2

Glimepiride 2mg + Metformin HCl 500mg (PR) + Pioglitazone 15mg TABLETS

GLIMEPIRIDE Enhances insulin secretion  
 METFORMIN Improves cardiovascular glucose metabolism by the liver  
 PIOGLITAZONE Improves insulin sensitivity by increasing muscle mass

### IN MANAGEMENT OF

Type-2 Diabetes Mellitus Patients Uncontrolled on Mono & Dual therapy

When Diabetes Grab the Sweetness of Life...

## GLEMITOL MV 2/0.2

Glimepiride 2mg + Metformin HCl 500mg (SR) + Voglibose 0.2mg TABLETS

GLIMEPIRIDE: Activates pancreatic 2-cells to release insulin  
 METFORMIN: Reduces the body's response to insulin  
 VOGLIBOSE: Improves intestinal glucose absorption

IN MANAGEMENT OF Type-2 Diabetes Mellitus Patients Uncontrolled on Mono/ Dual Therapy

# Current Product Portfolio

Each product is developed keeping clinical efficacy, safety, and patient compliance in focus.

**Sitapred-M 50/500**  
Sitagliptin 50mg + Metformin 500mg  
TABLETS

**ITAGLIPTIN:**

- Stimulates glucose dependent insulin secretion\*
- Associated with a low risk of hypoglycaemia\*

**METFORMIN:**

- Enhances insulin sensitive plasma membrane\*
- Beneficial preformed disease or the action of insulin\*

**Sitapred-M 50/1000**  
Sitagliptin 50mg + Metformin 1000mg  
TABLETS

**Sitapred-M 50/1000**  
Sitagliptin 50mg + Metformin 1000mg  
TABLETS

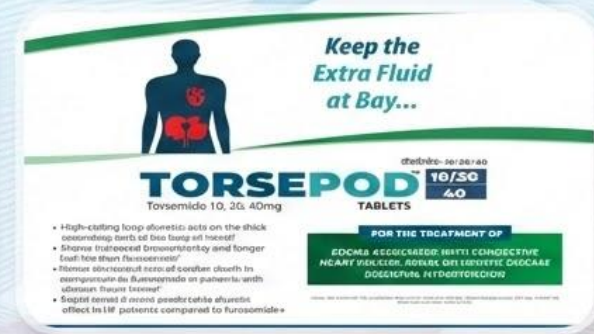

**SITAGLIPTIN:**

- Enhances and lengthens insulin action in diabetes\*
- Associated with a low risk of hypoglycaemia\*
- High concentrations of D-1 in active a typical half life of 16 to 13 hours\*

**SITAGLIPTIN:**

- Stimulates and lengthens insulin action in diabetes\*
- Associated with a low risk of hypoglycaemia\*
- High concentrations of D-1 in active a typical half life of 16 to 13 hours\*

**Sitapred-M 50/500**  
Sitagliptin 50mg + Metformin 500mg  
TABLETS

**TORSEPOD™ 10/30, 40**  
Toremide 10, 30, 40mg  
TABLETS

**FOR THE TREATMENT OF**

**EDSWAS ASSOCIATED WITH CONDUCTIVE HEART FAILURE, ASWAS ON ESWAS DEDSWAS, DEDSWAS, FIDEDSWAS**

- High-ceiling loop diuretic acts on the thick ascending limb of the loop of Henle
- Shows increased diuresis and longer diuresis than furosemide\*
- Shows increased efficacy in patients with congestive heart failure\*
- Shows increased efficacy in patients with congestive heart failure\*
- Shows increased efficacy in patients with congestive heart failure\*

Sitagliptin Phosphate & Metformin Hydrochloride Tablets

**Sitapred-M 50/1000**  
सीटाप्रेड-एम 50/1000 Tablets

10 or 15 Tablets

Toremide Tablets IP

**TORSEPOD™-20**  
टॉरसेपोड-20

10 X 10 Tablets

Toremide Tablets IP

**TORSEPOD™-40**  
टॉरसेपोड-40

10 X 10 Tablets
